

MULTI-CURRENCY — Executive Brief

Sequo CMS Account Management System · Multi-Currency Edition

Date: May 21, 2026

Elevator Pitch

MULTI-CURRENCY gives financial institutions one platform to onboard customers, operate per-currency wallets with live FX rates, move money across currencies and channels, and stay audit-ready—with GL posting, maker-checker workflows, and a modern operations console.

At a Glance

Component	Technology	Scale
Backend API	Spring Boot 2.7 · Java 8 · Hibernate · MySQL	~80 controllers · ~95 entities
Admin UI	React 18 · Redux · Axios	~120 screens · RBAC menus
Security	JWT · API key · AES encryption	Mobile + admin channels
Core domain	Multi-currency wallets	Wallet ID = Account + Currency

Business Benefits

- Launch multi-currency products faster; monetize FX and wallet fees
- Single operations console for configuration, transfers, and reports
- LRS/TCS, dormancy, closure, and full transaction audit trails
- Participant-based multi-tenancy for BaaS and banking groups

Key Modules (Implemented)

- MultiCurrencyWalletAccountController — wallets, priority, FX lookup
- LoadMoneyController — load money & transferCurrency
- AccountMasterController — customer account lifecycle
- BulkTransferController · JournalTransfer · SignUp/SignIn mobile APIs

Recommended Demo Path

- Login → Currency master → FX conversion → Create account → Load money report

Contact: Schedule a live demo — onboarding → wallet creation → FX transfer → statement
